Control delivery costs

Premium freight delivery can be very costly, with a strong correlation between time and price. DLS Worldwide, as part of RR Donnelley, a major shipper, understands this first-hand. We will work with you to determine the most cost-effective delivery method based on your deadline:

- same-day
- next-day
- 2-day

Beyond arrival time, transportation costs (and service levels) are also determined by volume. ***DLS Worldwide manages a consistently large volume of premium freight, enabling you to leverage our scale for highly-competitive transportation costs.***

Award-winning technology and industry recognized employee education programs.

Outstanding technology and people

Fast, expedient, and the latest technology go hand-in-hand. Realizing this, DLS Worldwide annually invests millions of dollars in updating and enhancing our Transportation Management Systems (TMS) for our customers. ***Accessibility and visibility to your freight-in-transit, as well as capturing and reporting on past shipments, is made easy with DLS Worldwide's TMS technology.***

Technology has measureable benefits, but it is only as useful as the people behind it. ***DLS Worldwide's local offices are staffed with resourceful, knowledgeable transportation professionals, averaging more than 15 years industry experience.***

With a commitment to keeping current with the latest market trends and technology, our people update their skills and build expertise with continuing education.
