Lost and damaged shipments	4 found	\$320.00 in potential savings

Prospectus
About this report
This report showcases the potential refunds found on recent shipping invoices. Each shipping account(s) is detailed by each of the auditing components detailed in the report, according to the attributes of each invoice.
Take for example the attribute of service type (delivery). Any shipments delivered late for a reason such as weather, was filtered from the refund success rate for a domestic shipment sent to a residential address. Consideration for such variables is provided.
Refund success rates are derived from email notifications received from different shipping accounts, with a statistical analysis of the attributes related to the shipment, the type of service, and the carrier used in the audit performed and the results are approximate, and only significant values are shown.

Prospectus
Potential refunds by type
Duplicate charges
Duplicate invoices, tracking numbers, and cost components occur within carrier statements.
Invalid delivery area surcharges
Rural delivery zones are charged additional fees. These fees are recoverable on recent shipments when incorrectly applied.
Lost and damaged shipments
Lost: Shipment which remain in transit for longer duration without a considerable reason are usually misplaced or lost by carrier. Damaged: A shipment which is delivered in damage condition or discarded due to damage. If shipper has purchased insurance, a claim can be filed for actual item value for these shipments, otherwise carrier insures these shipments up to \$100, and a claim can be filed for the same.

*Values are approximate, and only significant values may be shown.

Who is it for

Fortune 500 companies. Prospectus bridges the gap between corporate policy and showcasing the value of 3PL Freight Services as a strategic partner.

Companies looking for the right provider. If you're in the process of trying to find the best provider, or working with another auditor, then Prospectus showcases the quality of audit and potential recovery of refunds 3PL Freight Services would've secured from your recent invoices.

Features

Instant. 3PL Freight Services provides fast results. After submitting the requested invoices, a report will be sent to the recipient within minutes.

Real data. There aren't any placeholder numbers used here. Everything is calculated and populated using real transportation data to provide an accurate view of possible savings.

Analyzes each shipment. Not a single shipment is overlooked as 3PL Freight Services analyzes two weeks of carrier invoice data to identify overcharges and billing errors.

Directions

1. Go to <https://app.3plfreightservices.com/prospectus>

- **Upload recent FedEx, UPS and DHL invoices.**
How to directions on downloading invoices provided
- **Enter login credentials for FedEx.com etc.**
Here invoices will be downloaded automatically

2. Enter name and email address.

- Use your corporate email so we can link you with your team.

3. Watch the analysis run in real-time.

- Larger invoices take a few minutes to process.

4. Uncover the overspend found

- Results can be downloaded or emailed to others.

Tips

- This is just an audit. Disputes and claims won't be filed with the carriers as part of the Prospectus.
- Only recent shipments can be processed fully. This is a limitation by the carriers, not 3PL Freight Services. So, it's good to mention recent invoices to any customer uploading carrier invoices into Prospectus manually.
- The easiest way to ensure that recent invoices are used is to simply input the login credentials for the carrier <http://www.3plfreightservices.com>. The button is listed at the top of the Prospectus page.

How it works

Once the carrier invoices are received, potential refunds will be analyzed and divided by the following auditing points:

- **Service Failures**
- **Lost and Damaged Shipments**
- **Address Correction Surcharge**
- **Invalid Saturday Surcharges**
- **Invalid Dimensional Weight**
- **Duplicate Charges**
- **Invalid Residential Surcharges**
- **Manifested Not Shipped**
- **Invalid Delivery Area Surcharges**

Prospectus displays each each auditing point along with the amount of potential savings. The next step after analysis is to sign up for the 3PL Freight Services auditing and claim filing service. Claims must be filed for the refunds to be secured.

Note: If you're working with a different auditing company currently, then be sure to chat with our team about the fee-free auditing program that exists.

Pricing

100% free parcel audit web tool powered by 3PL Freight Services. Get a look at your potential refunds without spending a dime.

Security

3PL Freight Services takes security seriously. Here are some of the processes in place to ensure your data is protected within the app.

Infrastructure Security. All 3PL Freight Services services are managed within Amazon Web Services (AWS). Cloud security at AWS is the highest priority. The standards and certifications listed below support the global infrastructure of Amazon's cloud.

Data Encryption. Bidirectional encryption of communications between 3PL Freight Services and external endpoints, including web services and client devices are executed over HTTPS protocol using TLS 1.2. This validates authentication and protects against man-in-the-middle attacks, eavesdropping or tampering with the information related to your account. SSL certification is provided by Comodo using 256-bit encryption with support for 99.9% of browsers and devices.

SAS 70 Type II Audit Completion. Independent auditors certified AWS resources with certification of operational performance and security in safeguarding customer data.
